

PARAGAN HORSEBOXES

Seeing the world through horses' eyes

We are a manufacturer of horseboxes for entire Europe with a tradition for more than 30 years. We focus on the production of ultralight 3.5 t horseboxes for 2 horses and transport of 3 - 5 passengers with an option of overnight stay up to 4 persons. During the production process we emphasize the horses' and passengers' safety. For driving our horseboxes, only the B driving license is required.

While developing our horseboxes, we prioritize the top quality and ultralight materials. Therefore, Paragan horseboxes are the lightest ones on the market and have become very popular in Europe. We have acquired the inspiration not just from our customers, but also from the racing Paragan stable, which owns the winner of 127th Velka Pardubicka racing championship in the Czech Republic, No Time To Lose.

Our superstructures are characterized with the sophisticated design, long-term reliability, technical quality and obviously comfort of passengers and safe transport.

The PARAGAN brand has become well-known worldwide thanks to the wide dealers' network which has been still extending due to continuous demand growth. The Paragan horseboxes are delivered into 20 European countries.

EQUISTAR 3

THE LIGHTEST HORSEBOX ON THE MARKET

Equistar 3 is a compact horsebox designed for a prompt transport of two horses and three passengers. It is the lightest version of the Paragan horseboxes, which does not exceed 1210 kg of the payload capacity. Our priority is the passengers and, obviously, horses’ safety. Equistar 3 is also popular for its convenient operational costs, maneuverability and the length not even reaching up to 6 meters, which results with additional costs saving, i.e. the cheaper ferry transfers. A spacious storage room above the cabin, accessible from the horse area, can be closed with a net or a door. These can be found in our extensive range of comfort and safety vehicle configuration options.

TECHNICAL SPECIFICATIONS

Total weight	3 500 kg
Vehicle weight	Min 2 290 kg
Load capacity	Max 1 210 kg
Trailer weight	Max 2 500 kg

 Weights are without fuel and driver.

EQUISTAR 3XL

LARGER BUT STILL LIGHT

Equistar 3XL is a longer version of the Equistar 3 because it is built on longer platform. It is a compact horsebox designed for prompt transport of two horses and three passengers. Equistar 3XL is one of the lightest versions of Paragan horseboxes. Equistar 3XL is also popular for its convenient operational costs and maneuverability. The luton above cabine offers a more spacious storage room which might be secured by a net and/or a door. There is a larger tack room, ramp and flap comparing to Equistar 3. The prolonged length allows to install the Competition system.

TECHNICAL SPECIFICATIONS

Total weight	3 500 kg
Vehicle weight	Min 2 350 kg
Load capacity	Max 1 150 kg
Trailer weight	Max 2 500 kg

Weights are without fuel and driver.

EXCELSION 5

MORE SPACE FOR MORE FUN

Excelsion 5 represents a more spacious and comfortable version of Paragan horseboxes. Also, in this case, our priority is the passengers and horses’ safety. This horsebox is designed for two horses and five passengers. The rear seats in the have the option of converting to two bunk beds for overnight stays. Another rest area for passengers is located in the luton above the cabin. The cabin might be equipped with a table and swivel seats suitable for enjoying time with your friends and family. The large storage room is located under the rear bench, so it’s easy to access your belongings from the cabin and/or the side door from outside.

TECHNICAL SPECIFICATIONS

Total weight	3 500 kg
Vehicle weight	Min 2 470 kg
Load capacity	Max 1 030 kg
Trailer weight	Max 2 500 kg

 Weights are without fuel and driver.

Heated front seats

Sliding window with bars between cabin and horse area

Internal and external plugs

Door under bench

ALU wheels

Removable table with swivel seats

Entry step

Bridle hanger

Tack room shelf

EXCELSION 5XL

THE LARGEST AND THE MOST SPACIOUS
OF OUR HORSEBOXES

In combination of 5 seats cabin together with a prolong saddle area, Excelsion 5XL represents the longest and the largest Paragan horsebox. The horsebox transports 2 horses and a group of passengers up to 5 people with living for 4 ones. 5 seats cabin is equipped with bunk beds. Another two people might rest in the luton above the cabin. The removable table with swivel seats might be added optionally. The large storage room is located under the rear bench, so it's easy to access your belongings from the cabin and/or the side door. Free stand and Competition systems are recommended due to its length.

TECHNICAL SPECIFICATIONS

Total weight	3 500 kg
Vehicle weight	Min 2 500 kg
Load capacity	Max 1 000 kg
Trailer weight	Max 1 920 kg

 Weights are without fuel and driver.

BASIC SYSTEM

It is a standard and frequently used system. A fixed breast wall and a cover entirely protects a saddle area from all kinds of impurities produced by horses. At the same time, the system serves as a secure solution for horses protecting them from jumping over a partition and being stuck.

MAIN ADVANTAGES

- permanently clean saddle area
- in case of horse jumping over there is no risk of being stuck and/or injury while leaving the horsebox
- cutout profile allows easy access to horses from saddle area
- easy installation of protective V-grids preventing from horse’s jumping over
- head divider (folded from the roof) might be added as an option; it separates horses (ideal for horses of different sex)

BASIC SYSTEM INCLUDES

Fixed cover of saddle area

Fixed breast wall

i Ready for V-grid installation

PANIC SYSTEM INCLUDES

Tarpaulin cover

Removable breast wall

i Foldable breast wall

PANIC SYSTEM

An innovative system with a unique safety feature. The breast wall is fully removable and accessible from outside in case of emergency when it is necessary to lead a horse through a rear door out. To avoid horse’s jumping over the breast wall, we strongly recommend a stainless steel V-partition with a foal insert as an option. While the breast wall removed, it might be used for a transport of bulk load.

MAIN ADVANTAGES

- in case of horse jump over there is no risk of being stuck and/or injury while leaving the horsebox
- if necessary, it is possible to lead a horse out from the saddle area while the breast wall is easily disassembled from outside
- while the breast wall removed, it might be used for a transport of bulk load
- from easy washable and removable tarpaulin, hey might be served
- easy access to horses from saddle area thanks to the flexible tarpaulin
- very easy installation of protective V-grid against horse’s jumping over
- head divider (folded from the roof) might be added as an option; it separates horses (ideal for horses of different sex)

FREE STAND

The Free stand system is modern and very popular. It is a built-in box which includes a revolving head partition, a higher partition between horses and a safety door allowing an easy entry to horses’ area and/ or a safe leading horse out in case of emergency. Also suitable for restless horses, stallions or foals.

High partition between horses with grids and double lock for increased safety

Removable head divider with optional fixing

Double rear door to saddle area being able to open separately

MAIN ADVANTAGES

- design solution allows to adjust all partitions; a box for mare with foal or two boxes for stallions might be created
- a partition between horses is adjusted to prevent horse from crossing over to the other stall (especially for small horses) and/or mutual kicking
- potential horse leading out through saddle area in case of emergency
- easy access to horses from saddle area
- high head divider prevents from horses biting (ideal for horses of different sex)
- while walls positioned, the area might be used for a transport of bulk load

FREE STAND INCLUDES

COMPETITION INCLUDES

COMPETITION

The Competition offers a sport solution of the horse area with an entirely separated tack room. The useful system of a removable breast bar serves as the safety feature in case of unpredictable horse jump. The spacious tack room is separated from the horse area by the wall, which guarantees maximal cleanliness of your belongings. Thanks to the wide door, you can easily move through the rooms.

Removable breast bar

Wall separating saddle area

i Saddle area facility fully optional

MAIN ADVANTAGES

- in case of horse jump over there is no risk of being stuck and/or injury while leaving the horsebox
- competition might be installed only in prolonged versions (Equistar 3XL and Ecelsion 5XL) and therefor a tack box is easy to transport
- fully separated saddle area by a wall makes the clean space for your belongings, cloth and the other necessities for your horse
- easy access to horses from saddle area due to door width of 600 mm
- while the breast wall removed, it might be used for a transport of bulk load
- head divider (folded from the roof) might be added as an option; it separates horses (ideal for horses of different sex)

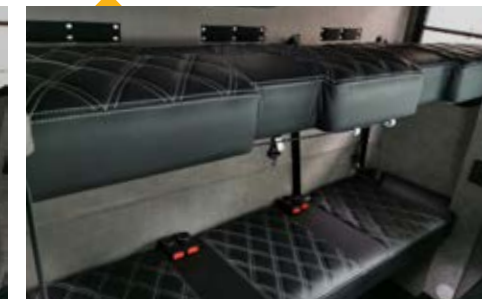

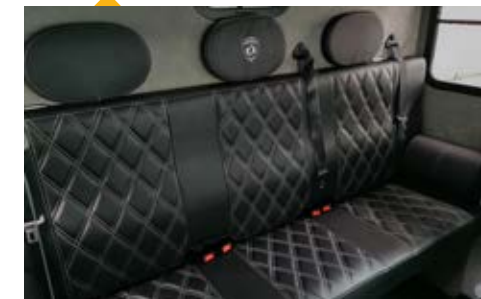

SLEEPING COMPARTMENT

Five seats cabin of Excelsion 5 and Excelsion 5XL horseboxes offer an option of comfortable sleeping with no need to search for hotels while traveling. There are two bunk beds in the cabin. Another two people might rest in the luton accessible from the cabin. Belongings might be stored under the rear bench where is a large storage room. The cabin might be equipped with a table and swivel seats suitable for enjoying time with your friends and family.

Folded rear bench ready for journey

Buck beds ready for rest

SEATS VARIATIONS

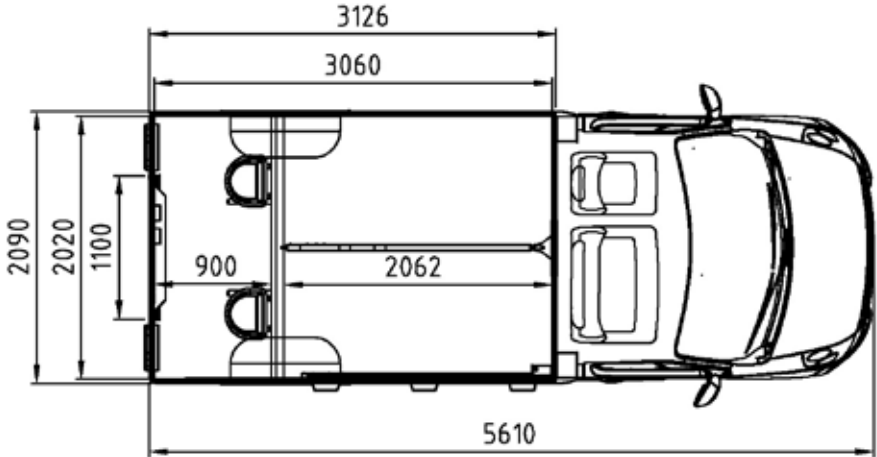

Adjust your cabin based on your requirements. We offer hand-made upholstery of seats including a steering wheel into leather. You might choose from top quality leathers of Dakota, Catania and/or Nappa Exclusive brands. By the combination of wide range of colors and types of stitching you get a unique horsebox. In cold days, higher comfort is increased with heated front seats and/or independent heating.
